

City Commissioners and City Council,

We the people and residence of Hayward, are petitioning and requesting a change of the approx. 40 homes to be developed on the corner of Eden and Denton. After reviewing the proposed plans we have found a disturbing find in the situation of the entrance and exit location to the new homes that is expected to be the new development driveway located on Denton.

With Denton being such a small road and a dead-end street, we the residents are a bit disturbed you may remove the thru traffic barricades that is already located at the end of Denton and will find this proposed entrance/exit more dangerous for our, children, elderly, handicapped and pedestrians safety with so much anticipated traffic for that small of a street.

We do propose to keep the home development, but propose a change to the street entrance to EDEN that can already handle the flow of traffic and still making easy access for the potential homeowner's as well has the Denton homeowner's and their long term families with no interruptions to our neighborhood.

This should be a simple correction for the developer, planners, and council on keeping the neighborhood safe while still having our wonderful look of a nicely historic aged and well maintained area for Hayward.

[illegible]

We suggest you open an entry to Greenwood homes on Eden ave and exit on Denton and make a dog/ cat park for animal lovers on the south end of Eden.

This will divide the park in two, one for people and one for animal lovers. There are infrastructures on the north end of the park where the children play. This recommendation will provide extra protection for our kids from any bit bull attack or any other dogs. Also this will provide added safety for Greenwood residence in case of Fire and Earth Quick (E.Q will happen, we just don't know when) Having dual entry points one from Eden and one from Denton ave will better facilitate emergency service and evacuation. Current plan only has entry and exit on Denton ave such a small cul-de-sac for the fire trucks to maneuver especially a ladder truck. Please consider keeping this area low density with historic charm of this area.
